

AMERICA MAKES OWN MACARONI

Industry Gained as Result of World War

Exports Now in Excess of Our Imports

Italian Dish Quite Popular in United States

BY FREDERICK J. HARKIN

(REUTERS DISPATCH)

WASHINGTON, Aug. 16.—Macaroni makers of Italy and China who have long dominated the world market in this food product have lost their best customer. Uncle Sam is now making his own macaroni. Moreover he is going after foreign business, also, and now exports more than he imports.

This one of the developments resulting from the World War which gave so many infant industries in the United States an opportunity to expand to a degree sufficient to meet post-war competition in the home market, and to convert the country from an import to an export.

Prior to the European conflagration the United States purchased an average more than 116,000,000 pounds of macaroni annually from other countries. Italy had

the large end of this desirable business and supplied 94 per cent of our imports.

Italy still furnishes the bulk of our imported macaroni, 80 per cent being her quota last year, but our receipts from abroad have dropped to such a point that Italy sold us only 3,415,000 pounds, as compared with an average of 109,000,000 pounds before the war. Our foreign sales total only about 7,500,000 annually at present, but they are materially in excess of our imports, and American manufacturers are making a drive to capture a much larger share of the world's business.

Exports of macaroni from the six principal export countries averaged in prewar years about 175,000,000 pounds, of which Italy supplied 140,000,000 pounds, or 79 per cent, and China 21,000,000 pounds, or 12 per cent. Shipments from France amounted to 2,000,000 pounds, and from Germany and Spain less than 1,000,000 pounds each. At that time the foreign business of the United States in this product was so insignificant that separate statistics were not kept of it by the Department of Commerce.

These same six countries are now exporting less than half as much macaroni as before the war, due to the heavily decreased shipments to the United States. Since the war Italy's exports to this country have exceeded during any one year 4 per cent of the prewar total, but she is practically holding her own in other markets, her shipments last year to countries other than the United States totaling 27,000,000 pounds as against a prewar average of 31,000,000.

Most of the macaroni factories in this country are located in or

WESTERN CHIEFS AT PROHIBITION PARLEY

When Lincoln C. Andrews, Assistant Secretary of the Treasury, opens his conference with the nation's dry chiefs tomorrow, among those present will be those shown below. They are: (left to right) Col. E. Masters, State director of Idaho; P. A. Gasoline, division chief of Seattle; Carl Jackson, division chief of Denver; (standing, left to right) A. K. Lusk, State director of Montana; Frank Dow, assistant to Andrews, and F. M. Peple, State director of Arizona.

WESTERN CHIEFS AT PROHIBITION PARLEY

near New York, which is the principal port through which the food is shipped in our export trade. With 35 per cent, while New Orleans ranks second with 30 per cent. Pacific ports, notably San Francisco and Seattle, handled about 15 per cent or practically the same amount that was shipped through the combined Canadian border ports. Very little macaroni is as a rule shipped from Philadelphia, Baltimore, Norfolk, Mobile, Galveston, and other minor ports.

Macaroni, a peculiar paste or ribbon of Italian invention, dough prepared from wheat flour and manufactured into tubes, or and although made by a simple process, has never been produced with as great success by any other country as the United States. It is said to go into the business. The grain grown in the more southern countries of Europe is said to possess a greater amount of gluten and, therefore, to be better adapted to this manufacture, but the statistics show that Uncle Sam is now able to do fairly well with his grain.

The use of macaroni on a large scale in the United States dates from about 1885, and where it was once introduced largely by Italians resident here it is now eaten by all classes of people.

Pastor Makes Seventy-fifth Climb Up Peak

COLORADO SPRINGS (Colo.)

Aug. 16.—Rev. Joseph B. Cherry, 57 years of age, Omaha Presbyterian minister, has climbed Pike's Peak for the seventh time. Walking up the peak is a strenuous task for most people, but for the minister it is just like an everyday pleasure.

He made his latest trip to the summit in five hours and twenty minutes and came down in three hours and fifteen minutes. He had no companion.

Dr. Cherry encountered considerable snow near Windy Point on the banks of the mountain near the cog-rail track. After timberline was reached the weather was cold and additional clothing was necessary.

Dr. Cherry established a record for trips up the mountains in the summer of 1921, when he climbed Pike's Peak seventeen times.

Copy Sent From Plate Engraved by Paul Revere

WORCESTER (Mass.) Aug. 16.

The American Antiquarian Society has received from the Scottish Antiquarian Society a rare Revolutionary War relic in the form of an impression from a copper plate, engraved by Paul Revere, which were struck off a great number of 45-shilling bills under authority of the Massachusetts Bay Colony in 1775.

The copper plate was discovered in Montreal, Quebec, 125 years ago, by a brass founder in a pile of junk gathered for smelting, and it was turned over to the Scottish Antiquarian Society. An impression was recently taken and sent to the American Antiquarian Society in this city.

PASTOR HEADS DRIVE FOR STATUE OF BRYAN

OKLAHOMA CITY (Okla.) Aug. 16.

Dr. Lincoln McConnell, pastor of the First Baptist Church, has been named temporary chairman and King L. Fitzpatrick, temporary secretary of a special committee of the Oklahoma Society of Tennesseeans that is to make plans for erecting a statue of the late William Jennings Bryan on the State Capitol grounds.

Other members of the committee are Judge J. T. Johnson, former chief justice of the Oklahoma Supreme Court; Judges Pay Lester and J. W. Clark, members of the Supreme Court; Col. R. A. Sneed, Secretary of State; George D. Key, John Tomerlin, Mrs. Francis Price and Mrs. Wilbur Brown.

The appointments were made by Judge Baxter Taylor, president of the Tennessee society.

"It is not the intention that former Tennesseeans alone shall raise a fund to erect a statue in memory of the late Congressman," says Judge Taylor, "but merely that this society shall sponsor the movement and aid it in every possible way."

MAJ. BURNETT TO RAY CITY

SAN FRANCISCO, Aug. 16.—

Maj. Thomas W. Burnett, Medical Corps, has been relieved from duty by the Organized Reserves of the Ninth Corps Area, on which duty he was stationed with headquarters at Portland, Ore., and will report to Letterman General Hospital, San Francisco, for duty.

BOY KILLERS FIND PRISON LIFE EASIER

Leopold and Loeb Given More Congenial Work in Penitentiary

(REUTERS DISPATCH)

JOLIA (Ill.) Aug. 16.—True to predictions made when they were sent to the penitentiary for life, Nathan Leopold, Jr., and Richard Loeb, slayers of little Bobby Franks, are finding imprisonment less irksome. Both have been given more congenial tasks.

During the slight outbreak of measles in the penitentiary a few weeks ago, Leopold was transferred to Joliet, the new prison, from which escapes are becoming so frequent that it constitutes a scandal. Leopold, who spent the first few months in the old prison braiding cane into seats for chairs, now has more congenial employment in the shoe factory at Joliet.

Loeb, who had an attack of measles and subsequently gave indications of approaching insanity, has fully recovered and has been promoted to work as a "runner" in the prison yards. This is outside work, chiefly errands, picking up refuse and clearing pathways for trucks. It is a desirable job, as prison jobs, and Loeb shows no further symptoms of "insanity."

It is vastly better than steady work all day in the furniture factory, work that was obnoxious to both murderers.

Angelino to Get Veterans' Hospital Job

(BY A. P. MURPHY WIRE)

ALBUQUERQUE (N. M.) Aug. 16.—Dr. David Lawrence, manager of the subregional office of the Veterans' Bureau in El Paso, has been promoted to the position of chief of the surgical service at the Veterans' Hospital at Fort Bayard, N. M. It was announced today by A. R. Gibson, regional manager.

RUSSIAN GIRL EXILE WEDS CHICAGO MAN

CHICAGO, Aug. 16.—Miss Resine, 24 years old, one of the Russian exiles deported from Vladivostok, was married this morning to Edward Canfield, said to be a man of wealth. It all came about through a purse the girl lost. She had been traveling as a model with a fashion show. In Chicago she lost all her funds. Canfield came to her rescue. The ceremony was held at St. George's.

Miss Resine says she is the daughter of a Russian Baron and that she came from Siberia with 1000 other Russians in two vessels three years ago.

SANTA ANA SALESMAN ARRESTED IN BAY CITY

(BY A. P. MURPHY WIRE)

SAN FRANCISCO, Aug. 16.—Joseph E. King, stock salesman, wanted both here and at Santa Ana on embezzlement charges, is in the City Jail here today and will be turned over to authorities from the Southern California city to answer charges there first.

Facts of the Santa Ana charges were not disclosed, but a San Francisco warrant charging King with having sold 450 shares of stock and keeping receipts amounting to \$1525. King was arrested in San Jose after a long search and was brought here today by detectives.

LOADED TRUCK SINKS THROUGH PAVEMENT

NEW YORK, Aug. 16.—A large loaded truck of the Ithaca Service Corporation, drawn by two horses, was making the turn at Madison avenue and Thirty-third street when the paving gave way. The rear of the truck sank through the asphalt and forced up the front, leaving the horses suspended in midair.

The driver, Martin Teorano, and his helper, Ben Stone, cut the harness with their knives and let the horses down and the police emergency crew came to help extricate the wreckage. It is believed the foundation of the street had been undermined by water or shifting sands.

NEARLY HIT BY FALLING FISH

Hawk Drops Flounder in Front of New England Physician

(REUTERS DISPATCH)

WESTFIELD (Mass.) Aug. 16.—Dr. Midge D. Chisholm, who has returned home from a vacation spent in Maine, escaped injury when a flounder, weighing a pound and a half was dropped by a fish hawk several hundred feet in the air. The hawk fell directly in front of Dr. Chisholm, who was promenading the lake front. Dr. Chisholm stopped when he heard a splash in the air and the flounder fell at his feet. Scanning the sky, he saw the fish hawk in the air. Marks of the claws of the hawk were visible in the side of the fish.

CANADA PEONY BLOOMS SHIPPED TO WEMBLEY

WEMBLEY (Eng.) Aug. 16.—A shipment from Canada for the British Empire Exhibition arrived here recently. It consisted of 2000 peony blooms, grown in Canada, and brought over at the request of the Canadian National Railway. They were grown by W. Ormiston Roy of Mount Royal, the mountain which overlooks Montreal.

The peonies came over in cold storage.

Worker Fights Bees on Steeple 200 Feet in Air

(REUTERS DISPATCH)

PITTSFIELD (Mass.) Aug. 16.—Bishop Joseph Edward Hoke of North Adams, while making repairs on the steeple of the First Methodist Church here, was considerably disturbed by a swarm of bees that attacked him continually. Although 200 feet from the ground, with just a rope around him, he was obliged to resort to a blow torch in order to drive the pests away. He attracted considerable attention the way he was endeavoring around the steeple to avoid the bees.

GIRL RECOVERS SHIRT STOLEN FROM LINE

JERSEY CITY (N. J.) Aug. 16.

A youth believed to have been responsible for numerous recent robberies was taken into custody through the pugnaciousness of the small daughter of Justice of the Peace Joseph J. Kagan of Jersey City, who objected to the lad appropriating her father's shirt. The daughter Lillian, 13 years of age, saw Vincent Polakowski, 18, wearing her parent's shirt, which had been hanging on a line in the yard. A tussle ensued, the girl attempting to take the shirt from the boy's back. At this juncture a policeman happened along. The boy confessed having robbed eight stores in the vicinity.

Use of four-wheel brakes and balloon tires on American autos has won the French, who formerly were prejudiced against automobiles from this country.

MS Same Fine Car—At a Lower Price

Studebaker One-Profit Coach on the Standard Six chassis retains all the features which made it a big seller at a higher price—though you can now buy it for—

THIS IS A
STUDEBAKER YEAR

\$346

Down—in Los Angeles

Balance in convenient monthly payments

STUDY these features which make the Studebaker Standard Six Coach more up-to-date than the newest "yearly models."

They are possible at our new low price only because of Studebaker's one-profit basis of manufacture, which eliminates the extra profits that many other manufacturers must pay to outside parts and body-makers.

Excess Power—according to rating of National Automobile Chamber of Commerce, this is the most powerful car of its size and weight.

Abundant Room—room to stretch your legs—room to enter or leave without disturbing occupant of folding seat.

Sturdy Body Construction—fine Northern white ash and hard maple are used. We pay a premium to get the best quality of steel.

Full-size Balloon Tires—for which the steering gear, fenders and even the body lines are specially designed.

Automatic Spark Control—eliminating the usual spark lever on steering wheel.

Emergency Brake—operated from the dash, thus giving more front seat room. Another exclusive Studebaker feature.

Safety Lighting Control—on the steering wheel, at the driver's finger tips.

Instruments—including 8-day clock, gasoline gauge, speedometer, oil pressure gauge and ammeter, in single grouping under glass, on beautiful silver-faced dial.

Improved One-piece Windshield—automatic windshield cleaner, weather-proof vision, rear-view mirror and attractive cowl lights.

Coincidental Lock—to ignition and steering wheel, which serves to reduce the theft insurance rate on Studebaker cars—a single key operates this lock as well as that on the door and the clever device on the spare tire carrier.

Cowl Ventilator—operated by foot.

Combination Stop-and-Tail Light.

Completely Machined Crankshaft—to obtain perfect engine balance and thus reduce vibration to a minimum.

Oil Drain Valve—at side of engine, for draining engine oil without getting under car.

Waterproof Ignition—even the spark plugs are protected from moisture by rubber shields.

Hudson-

Why Studebaker is able to cut prices \$50 to \$405 without any sacrifice in quality

DID you ever see a farmer plowing a rich stand of clover or peas back into the ground instead of harvesting it? Looks wasteful, but it means that the soil thus enriched will yield most bountifully in the future.

Studebaker's patient stockholders have in a similar manner foregone dividends in order that there might be created (for the building of one-profit cars) the greatest, the most efficient automobile manufacturing establishment of its kind.

Of all Studebaker earnings during the past two years, 53% have been retained in the business—a total of more than sixty million dollars plowed back into the property as foundries, forges, machine shops, body plants, stamping mills, dry kilns and working capital.

As a result, there are now two automobiles manufactured on the one-profit basis—the Studebaker in the fine-car field, and the Ford in the low price field. Only in these two cases does one company in its own plants and with its own centralized organization make all bodies, all engines, all clutches, steering gears, differentials, springs, gear sets, gray iron castings, and drop forgings.

\$100 to \$250 saving per body

The advantages of this one-profit manufacturing are not theoretical. Studebaker has bought closed bodies in the past from the most efficient body builders. But better bodies are now being built in Studebaker plants at savings running from \$100 to \$250 per body. Studebaker's new gray iron foundry—one of the largest in the world—is producing castings for 25% less than they can be purchased outside.

And Studebaker has been able to concentrate one hundred million dollars in net assets on the production of one-profit motor cars without sacrificing its independence. Studebaker has none of the entangling alliances nor overhead that go with holding companies, mergers, outside financing. Studebaker has no bond issues, nor bank loans.

Therefore, Studebaker designers, engineers, purchasing agents, and all other executives are free and independent—able to concentrate all energies upon the production of the best possible cars at the lowest possible prices.

Fruits of independence

Because of all this Studebaker is able to offer you such splendid values as the Standard Six Coach pictured above at its new low price. And you and your neighbors are buying Studebaker cars in such numbers that the vast Studebaker plants have been going at peak production all summer in defiance of the normal summer slump. (That's where the stockholders are repaid for the sacrifices they have made.)

The Standard Six Coach has some obvious superiorities. (Note, for instance, the equipment and basic suggestions enumerated in the column at the right.) But the most important ones are hidden.

Only time reveals hidden merits

Any kind of steel may do for the first few thousand miles, but Studebaker pays premiums for steel of extra toughness and endurance.

You can't tell by looking at a new car how soon rattles and squeaks will develop, but if you could see the painstaking way in which

skilled workmen build Studebaker bodies from fine northern white ash and hard maple, you would appreciate why the Studebaker car retains its youth.

And above all else, Studebaker's endurance, stamina, and dependability are due to the fact that each car is designed, engineered, and manufactured as a closely co-ordinated, harmonious unit. Being built as a unit, it functions as a unit, and even under the hardest usage the rugged Studebaker yields scores of thousands of miles of excess transportation.

Every automobile is a highly specialized piece of machinery, and the one-profit basis of manufacture not only permits savings which can be passed on to the purchaser in finer materials, more equipment, and lower prices, but it also enables Studebaker to build a better machine.

"No yearly models"— New low prices

To minimize depreciation of Studebakers in the hands of owners, the Studebaker Corporation of America has adopted the policy of keeping its entire line of cars constantly up-to-date without the announcement of "yearly models."

Improvements and refinements are added as soon as developed—not saved up for spectacular annual announcement. Therefore, Studebaker cars are even more up-to-date than the newest yearly models, yet owners are protected from the artificial depreciation which has cut millions of dollars from the resale value of many makes during the past 30 days.

New low prices make the one-profit Studebaker a better value than ever.

MAY INCREASE CLUB'S ROSTER

Oaks' Youthful Infield Arouses Interest of Fans

League Boss Praises Work of Herman of Seattle

Dead Material to be Weeded for Next Season

The possibility of a rule for next season increasing the number of players on each club and limiting the veterans to sixteen or seventeen, is evidenced by Harry A. Williams, president of the Pacific Coast League, who recently returned from a sixteen-day trip around the circuit with the exception of Salt Lake City, which he visited earlier in the season. During the trip he visited Oakland, Portland and Seattle.

That which left the most vivid impression was the interest being aroused by young players—Oakland's kid infield, the present Portland and Herman, Lucas and Emmer in Seattle. On the road, hundreds who were not particularly interested in Oakland's present standing, flocked out simply to see this infield in action.

The aggregate age of this infield is only seventy-nine years, or an average of less than twenty years per player. It is the best young combination ever seen in this circuit, and probably will be the regular infield next season.

PHENOMENAL BALL

"Herman of Seattle is playing simply phenomenal ball both at the plate and in the field," declared Williams at the present rate of improvement, he will be the country's leading first baseman within a few years, as well as the largest. Already a giant, he will continue to grow and fill out for two or three years yet. He is really just beginning to find himself around first base as shown by his improved footwork.

Of course, the number of veterans and youngsters which will comprise the club next season is a matter which rests solely with the club owners, but I am inclined to think there will be a considerable weeding out of dead material. This should result in just as good baseball, and more interesting baseball. Unquestionably the players will see more young players tested out than ever before in the league's history.

LEAGUE OF PORTS

"Baseball is fundamentally sound, and the league struggle need only take a trip through it or glance at a geography to realize just how literally it is a Coast League. Every city in it, with the exception of Salt Lake City, is a port, and rapidly growing ports—Los Angeles, San Francisco, Oakland, Portland, Seattle and Sacramento. Many do not realize that Sacramento, some distance inland, is a port. But it is a river port, and a very busy one. It is in these port cities, comprising the Coast League, that America's greatest growth for the next fifty years will be seen. Should the Salt Lake club be moved to the coast, as has been suggested from time to time, then in the event of rail trouble, it will be possible to reach any city in the circuit by boat, with the airplane in reserve as a last resort.

"In Seattle I found that Honolulu is making an informal bid for a franchise in the Coast League, founding this on the expected development of seaplane transportation between Hawaii and the coast ports. This is a Coast League, and is something which hardly will be realized. The Coast League aims at greater compactness rather than expansion."

WHO CARES FOR FORM?

How often have you heard the expression, "His form is terrible, he'll never get anywhere?" That's what the experts said about Al Simmons when he came to Connie Mack's team in 1934 from the Milwaukee Club, yet Al hit .308 in 143 games in his first year in the majors. This year he is among the first half a dozen or so home run hitters and is batting around .350.

Al Simmons "bat with one foot in the water bucket," which, in baseball slang, means that he pulls away from the plate with his front foot. Batters are supposed to "step into the ball." But Simmons uses the longest bat in major league baseball, which counteracts his pulling away. Simmons is an example of a ballplayer who is a success in spite of the fact that he has poor form.

Firpo's form was terrible, he had scarcely anything but a clubbing right-hand blow which he "telegraphed" before using, yet he fought his way to hundreds of thousands of dollars.

Charlie Paddock runs all wrong, and Al Simmons swims all wrong, according to form as it is taught in sprinting and swimming, yet both have made millions of dollars.

In 1935 the rowing experts gave the Stanford crew the merry "Ha Ha," before the Poughkeepsie regatta, yet the westerners finished second.

Good form isn't always necessary to success, except in one sport—golf.

MOVIE NINE OUT SOON

Hollywood Baseball Club to Take on All-Stars in First Game Since Denver Trip

The Hollywood baseball club, recognized as one of the fastest independent teams on the Pacific Coast, will start playing soon in their first game since returning from Denver, Colo., where they went to compete in the Rocky Mountain baseball tournament. The club won two games in the tournament and then withdrew and left when a game was protested against them and taken away.

Hancock baseball park, the home of the Hollywood ball club, located on Highland avenue and Santa Monica Boulevard, is being renovated and will be put in the best possible shape. Floyd Carleton, manager, expects to have a faster ball club this winter than the one that represented Hollywood a year ago. Such well-known major league stars as Ernie Vache, Boston Red Sox; Walter Kinnick, Philadelphia; Leslie Cook, Salt Lake; Bud Brown, Galveston; Bill Baker, St. Louis; Cutting, Toledo, and Bob Shanklin were a few that appeared in the line-up. Practically the same group will play this coming season.

The first game will be played next Sunday, when they tackle the All-Stars in Hollywood. Carleton, former Hollywood High School pitcher, who won all the games for the movie city club, will be the pitcher. Johnson, who will be the catcher, will be the pitcher. Johnson is a young star with plenty of talent, and it will not be many months before he is signed by some big league team. He has refused several Coast League contracts.

BARNES UNABLE TO PLAY IN OPEN GOLF

CHICAGO, Aug. 16.—Jim Barnes of New York, British open golf champion, today said that he probably would be unable to play in the western open tournament at Yountstown this week, as he had been over-looked by his British conquer and his long tour of the Pacific Northwest ended today.

ARROYO RECO 13, AGES 13

In a wild, free-hitting game the Arroyo Reco Club trounced the Dan's Twelve Aces 13 to 1, at the Arroyo Reco Playhouse. The score: Dan's 12 Aces 13, Arroyo Reco 1.

HARBOR PLANS HOLD SURPRISE

New Enterprises Involved in Railway Deal

Additional Steamship Lines Expected as Result

City to be Enriched by Forty-five Acres

Details of the proposed trade whereby the Union Pacific Railway would deed forty-five acres of waterfront in East Los Angeles to the Harbor Department, in return for Harbor developments, are expected to be made public shortly. When they are, it is said, shipping and industrial folk will be amazed by the way the plan is laid out, which are said to contemplate a number of big industries and the entry of two or three additional steamship lines to serve these new industries.

Negotiations have been under way for almost a year, but information as to the coming of industries and ship lines in that connection is still merely conjecture. Sugar mills and other plants handling bulk cargoes will be located on this East Basin development, if the rumors are true. The raw materials would come from many distant places, and justify not only a trans-Pacific steamship line to this port, but one or two other lines as well.

The survey now in progress on the east side of the channel which runs from the California Yacht Club to the Consolidated Lumber Company. Untouched at present, it would be converted into four long finger of land, with docks, berths, and wharves, and a large terminal building, affording accommodations for passengers and cargo.

Near-by truck boulevards and railway facilities would make handling transportation a simple matter.

From the plan drawn by Harbor Engineer George F. Nicholas, the city would be enriched by at least forty-five additional acres of water front estimated to be worth \$1,000,000.

In the statement of T. H. Larke, shipping men have the nearest approach to official confirmation of rumors long about, that the Panama-Pacific Line will build two new passenger ships for the intercoastal trade.

Larke's statement was made at San Diego, where he is president of the Club to the Consolidated Lumber Company. He is returning with his family after a tour of the world, following his temporary retirement from the Pacific Coast.

Coast manager for the Panama-Pacific Line.

He was quoted as saying plans and specifications are already being drawn for the two ships, and that they will be as big as the largest liners now in the world.

They will be fast, and have luxurious accommodations for passengers.

PRODUCING & REFINING

AN OIL MINING

TWO PRODUCERS ADDED TO FIELD

Wells Located on Eddy Tract in New Mexico

Production Figures Have Not Been Announced

Other Activities in District Summarized

(EXCLUSIVE DISPATCH)
ARTESIA (N. M.), Aug. 16.—Two wells were completed in the Eddy county field during the week. The No. 21 well of Flynn, Welch & Co. is located on the Eddy No. 13 well on Sec. 11, 18-28, was given a shot of 25 barrels and has been flowing by heads, according to reports, its probable output being estimated at about 600 barrels daily. The Sandburg Petroleum Company's No. 1 on Sec. 10, 15, 18-28, has been producing, but an estimate of its output has not been announced.

The Mallamar Oil and Gas Company has two wells on top of the sand, they are the No. 7 and No. 8, located on the north line of Sec. 10, 15, 18-28.

Two other wells are being drilled in by the V.K.F. Oil Company of Shreveport, La., which opened the Smackover field. Attracted by the favorable drilling conditions, this group of operators entered the field several months ago and now have some of the best production in the district.

The company has been fortunate in picking up two good sands in its production on Section No. 17, well on the Eddy No. 13 well on Sec. 11, 18-28, was given a shot of 25 barrels and has been flowing by heads, according to reports, its probable output being estimated at about 600 barrels daily.

The Ohio Oil Company is drilling in its No. 3, offsetting the No. 1 well on the Toomey-Alton lease on Sec. 10, 15, 18-28, and the No. 2 well on the New State lease on Section No. 4.

Snowden & Mcweeney are completing their second producer on the northern part of Section No. 11, Malone & Chambers No. 1 well on Section No. 4 is being drilled in completion, with the bottom of the hole reported to be at 2440 feet. Shallow gas has been picked up in the Mesa Oil Company's No. 1 well on Sec. 10, 15, 18-28, the flow being estimated at 1,000,000 cubic feet per day, coming from the 700-foot level.

A blow-out in the William Keeler No. 1 well on Sec. 10, 15, 18-28, at a depth of 430 feet, hurled mud and rocks over the ground for forty minutes. A cave-in shut off the flow of gas. After drilling through 1900 feet of sand, the Snowden, Mcweeney No. 1 well on the Twip Hills addition is now below 2740 feet. This well, located at 480 feet, is said to be similar to that obtained in the Big Lake field.

Orl. Robert D. Gordon and associates have taken over the Brown lease west of the river and will begin immediate reclamation work. This lease is the location of the original well in this field. It was drilled eighteen years ago and, although it made considerable water, it produced as much as 25 barrels of crude oil daily for a long time. Col. Gordon, in addition to trying to put the well back on the pump, will drill another test on the lease, which comprises 318 acres. The old Brown production comes from a sand at 900 feet.

Another well on the west side of the Peoria River is being drilled by Sam Clark and associates, it being on Sec. 10, 15, 18-24. It is down 450 feet.

Keck Syndicate Will Test Area Near Woodland

(EXCLUSIVE DISPATCH)
SACRAMENTO, Aug. 16.—The Keck Syndicate, Inc., of Los Angeles, has taken over the lease held by A. B. Gifford on potential oil lands near Woodland. The lease covers acreage in the Brooks, Raparte, Madison and Tancro districts.

Indications of oil and gas are said to have been found. According to reports received here the Keck Syndicate, Inc., plans immediate erection of one or more test wells to drill test wells.

The Associated Oil Company Nevada capitalists are interested, has resumed drilling in the Columbia district near Williams.

Oil prospecting is proceeding in fully a dozen districts north and northwest of Sacramento, and at various points in the Sacramento Valley. Several geologists have recommended drilling on promising structures in Colusa, Butte, Yuba, Sacramento and Rio del Norte counties. Most of the companies at work are controlled by Los Angeles and Long Beach capitalists.

NEW WELL IN FAMOUS ZONE

Completion With Output of 2400 Barrels Daily Regarded as Most Extraordinary in Oil Industry

BY HOWARD C. KEGLEY

Completion by the Shell Company, a few days ago, of a 2400-barrel well in the Brea-Olinda field, between two old wells which together have produced nearly 8,000,000 barrels of oil, has given the oil industry something entirely new to think about.

The new well, known as Orange No. 3-A, is a new hole which was drilled to take the place of Shell's old Orange No. 3, the casing of which collapsed a few weeks ago, after the hole had produced between 2,000,000 and 3,000,000 barrels. The new well is only a dozen yards from the old one.

Still more extraordinary is the fact that the Orange No. 3-A is not over 200 feet from the Birch No. 1, which is producing 175 to 200 barrels of oil a day.

According to Mr. Birch, the old No. 3 has produced between 4,000,000 and 5,000,000 barrels of petroleum—close to the latter figure. Except for a brief shut-down in 1917, the hole has been producing almost constantly since it was completed twenty-five years ago. Its only resting periods have been occasional spells when crews have cleaned it out and repaired its pumps.

The No. 3 was drilled 3900 feet deep. It came in at 1400 barrels a day. At the end of two years, according to Mr. Birch, it was still flowing 2000 barrels a day. After flowing for five years it tapered off and was put on the pump, and the hole has been producing ever since.

The remarkable thing about these details is that the new well, located between the old Orange No. 3 and Birch No. 1, showed the same production when it was completed the other day that the Birch No. 1 showed when it was completed a quarter of a century ago.

The Orange No. 3-A was finished at a depth of 3900 feet and the second was found 100 feet lower.

The Ohio Oil Company is drilling in its No. 3, offsetting the No. 1 well on the Toomey-Alton lease on Sec. 10, 15, 18-28, and the No. 2 well on the New State lease on Section No. 4.

Snowden & Mcweeney are completing their second producer on the northern part of Section No. 11, Malone & Chambers No. 1 well on Section No. 4 is being drilled in completion, with the bottom of the hole reported to be at 2440 feet. Shallow gas has been picked up in the Mesa Oil Company's No. 1 well on Sec. 10, 15, 18-28, the flow being estimated at 1,000,000 cubic feet per day, coming from the 700-foot level.

A blow-out in the William Keeler No. 1 well on Sec. 10, 15, 18-28, at a depth of 430 feet, hurled mud and rocks over the ground for forty minutes. A cave-in shut off the flow of gas. After drilling through 1900 feet of sand, the Snowden, Mcweeney No. 1 well on the Twip Hills addition is now below 2740 feet. This well, located at 480 feet, is said to be similar to that obtained in the Big Lake field.

Orl. Robert D. Gordon and associates have taken over the Brown lease west of the river and will begin immediate reclamation work. This lease is the location of the original well in this field. It was drilled eighteen years ago and, although it made considerable water, it produced as much as 25 barrels of crude oil daily for a long time. Col. Gordon, in addition to trying to put the well back on the pump, will drill another test on the lease, which comprises 318 acres. The old Brown production comes from a sand at 900 feet.

Another well on the west side of the Peoria River is being drilled by Sam Clark and associates, it being on Sec. 10, 15, 18-24. It is down 450 feet.

Oil prospecting is proceeding in fully a dozen districts north and northwest of Sacramento, and at various points in the Sacramento Valley. Several geologists have recommended drilling on promising structures in Colusa, Butte, Yuba, Sacramento and Rio del Norte counties. Most of the companies at work are controlled by Los Angeles and Long Beach capitalists.

Indications of oil and gas are said to have been found. According to reports received here the Keck Syndicate, Inc., plans immediate erection of one or more test wells to drill test wells.

The Associated Oil Company Nevada capitalists are interested, has resumed drilling in the Columbia district near Williams.

WILDCAT WELL HOLDS INTEREST

Production Test Will Be Made in Ten Days

Opinions Held Prospects Not So Good Now

Drillers Hit Granite in Past Week's Work

(EXCLUSIVE DISPATCH)
DELANO, Aug. 16.—With a production test a matter of about ten days distant, intense interest is being manifested by the owners in the Chanlor-Catfield Midway Oil Company's wildcat well, Quinn No. 1, near Jasmene, but it is generally admitted that the prospects there are not so good as they were two weeks ago.

On Saturday it was reported that the hole was down 3445 feet and that the crew had stopped drilling. It appears that the drill was stopped for a time, but that the crew is going ahead again slowly. A week ago it was reported that the bit had struck granite, which was anything but a favorable condition.

R. M. Smith, one of the company's executives at Delano, is quoted as having said: "We don't know that the formation is granite, but for the last few days we have been drilling through extremely hard formations."

The fact that Chanlor-Catfield has just sold the General Petroleum Corporation a half-interest in its 1600-acre Harry Quinn lease at Jasmene is regarded as an indication that the outlook is not particularly encouraging. Reports from Bakersfield say that the General Petroleum sold the half-interest for \$14,000.

Arrival of J. K. Porter from Los Angeles with a string of trucks bearing a steel derrick, a rotary outfit and other equipment for drilling a wildcat on Section 32, 24-28, thirteen miles east of Jasmene, created a lot of conjecture during the latter part of the week.

The trucks bore the Shell Oil Company monogram. It is asserted, although Mr. Porter declares that he intends to drill as an independent unit, that the well is being drilled by the Shell Oil Company.

The Miller-Kern test is located on Section 11, 27-28, four miles southeast of the location for the Porter test, and the Jasmene well is located ten miles northwest of it.

Surveys recently made by an aerial photographer, it is reported, reveal a well-defined fold extending from the Miller-Kern well, north of Poso Creek, to the Jasmene test hole in the low hills east of Jasmene.

It is reported that America's best gun in the World War, which had a range of 18,000 yards, is now being replaced by one of similar caliber with a range of 25,000 yards.

According to estimates made by mining engineers, and confirmed by E. W. Myers, E. M., and the engineer on the staff of the commission, \$22,524 in ore is blocked out in the mine workings, ready for extraction and mill treatment, averaging, or an average, \$22.40 in lead, silver and copper per ton, with fair values in gold.

The board of directors of the California Hercules Mining Company of Los Angeles, has been elected, and the company is now ready to start operations. J. Walter Hanby as president; B. Caruthers, vice-president; and F. M. Kennedy, general manager.

Mr. Hanby, a prominent mining man, is in charge of the company's property on Lytle Creek, San Bernardino county.

Having recently obtained its permit from the California Corporation Commission, the company immediately doubled the working force at the mine, and has increased activity in the performance of development work and the placing of additional tonnage of ore in sight. With this accomplished, the proposed mill plant, now partly installed, will be completed and the property placed on regular and quiet production.

Marland Takes Lease on Tract at Buttonwillow

(EXCLUSIVE DISPATCH)
BAKERSFIELD, Aug. 16.—Following in the wake of the Milham Exploration Company, which signed up heavy acreage in the vicinity of Buttonwillow, the Marland Oil Company has just leased 520 acres in that area from R. H. Anderson of this city, who obtained the lease from Miller & Lux.

Marland is to start drilling there by July 1 next year and is to drill sixteen wells. It is found in paying quantities.

The specific description of the lease includes the following lands: The west half of the southeast quarter of Sec. 5, and the west half of the northwest quarter of Sec. 24, 25-28, the east half of the southeast quarter of Section 29, 21-23, and the west half of the southeast quarter of Sec. 5, 25-28.

A second lease filed here indicates the sale for \$10,000, of Lots 1 and 2, Sec. 18, 25-28, in the Rio Hondo district, by Thomas and Hattie R. Brown and Josephine and Emma C. Brown to Robert Bello.

The Hercules Mine Board Chooses Hanby as Head

\$210,000 Santa Maria Gas Company

First and Refunding Mortgage 6% Gold Bonds

Dated April 1, 1920 Due April 1, 1940

Coupon bonds of \$1000 denomination. Interest payable semi-annually April 1 and October 1 at the Wells Fargo Bank & Union Trust Company of San Francisco or at The First National Bank of Santa Maria, California. Redeemable in whole or in part in numerical order at the option of the company on any interest payment date at 101 and accrued interest. Authorized \$700,000; outstanding \$210,000. Wells Fargo Bank & Union Trust Company, San Francisco, Trustee.

EXEMPT FROM PERSONAL PROPERTY TAX IN CALIFORNIA

ISSUANCE AUTHORIZED BY THE RAILROAD COMMISSION OF CALIFORNIA

The following information is taken from official and other sources:

COMPANY The Santa Maria Gas Company was organized under the laws of the State of California on March 16, 1920, as successor to the Santa Maria Gas and Power Company. The Company is engaged in distributing natural gas for domestic, commercial and municipal street lighting purposes in portions of San Luis Obispo and Santa Barbara Counties, including the following cities and towns: Santa Maria, San Luis Obispo, Orcutt, Pismo, Guadalupe, Arroyo Grande, Betteravia, Nipomo, Siquoco, Avila and intervening territory. The Directors of the Company are: Thos. R. Adam, M. P. Baker, R. E. Easton, G. L. Goodwin, J. P. Goodwin, Paul O. Tietzen and J. H. Tietzen.

The Company obtains its supply of natural gas under contracts from oil companies operating in the Santa Maria Fields. The supply of gas is considered to be adequate for many years in the future. During 1924, the Company's gas output was \$94,159,600 cubic feet. The Company's system includes the necessary compressor plants, 375 miles of high pressure transmission and distribution mains, gas holders and meters. The Company serves 4700 customers. The franchise under which the Company operates, with only one unimportant exception, all expire beyond the maturity of these bonds.

EARNINGS The earnings of the Company for the last fiscal year were 3 1/2 times its fixed charges and have shown a consistent increase in both gross and net from year to year, as is evidenced by the following tabulation covering the past four calendar years ended December 31:

	1924	1923	1922	1921
Gross Revenue	\$271,586	\$262,254	\$259,118	\$258,200
Operating Expenses, Taxes and Depreciation	242,951	244,994	238,281	184,929
Net Revenue	\$28,635	\$17,260	\$20,837	\$172,271
Interest on Bonds and other Fixed Charges	22,839	28,255	24,332	29,773
Balance	\$5,796	\$1,005	\$1,505	\$1,778
Fixed Charges Earned	2,4	2,4	2,4	1,8

SECURITY These bonds are secured, in the opinion of counsel, by a direct lien on all of the property of the Company now owned or hereafter acquired. This issue is subject only to the lien of a closed mortgage securing \$124,000 Santa Maria Gas and Power Co. First Mortgage 8% Bonds, due April 15, 1927, for the retirement of which bonds of this issue are reserved. The capital assets of the Company, consisting of land, buildings, pipe lines, equipment, franchise, etc., were carried on the books of the Company, as of December 31, 1924, at \$672,816, after a liberal reserve for depreciation, or nearly two times the total amount of bonds outstanding, including underlying bonds.

The validity of these bonds has been approved by Messrs. Chickering & Gregory, Attorneys, San Francisco. Examination of the Company's properties made by Arthur R. Kelley, Valuation Engineer, Los Angeles. Books and accounts of the Company audited by Price, Waterhouse & Co., Certified Public Accountants.

The Sancer

by
Harry Carr

A TRAGIC crisis is approaching in this country. It is a crisis infinitely worse than any danger that this country faced in the World War.

PERFECT SYSTEM

In a recent issue of the Saturday Evening Post, a former Ambassador of the United States wrote of this machine.

He showed how this great crime gang has adopted all the methods perfected by "big bus-

It works from central office with clerks and perfected systems and chiefs and subchiefs. It is backed by the wealth of the bootleggers. The actual crimes are committed by trained experts—mostly smart boys.

CIVILIZATION IN DANGER

If this thing is permitted to grow, conditions eventually will become so terrible that civilization will stagger under the blow.

The United States is now responsible, not only for itself but for the world. Our wealth and power have assumed gigantic proportions that whatever we are, the whole world will be.

—

THE CRIPPLED LAW

The only remedy for this cancerous disease is to cut away the obstructions that are blocking the efficiency of the law.

HANDCUFFED JUDGES

Most perilous of these obstructions is the system by which judges are chosen.

Popular election of judges is a ridiculous absurdity. It forces every judge who hopes to retain his job to keep his mind on the problem of getting favorable publicity, rather than administering justice.

Judges have been stripped of almost all their power in criminal

a dummy on the bench forbidden to comment on the weight of the evidence, compelled to allow the attorneys to write his instructions to the jury, bound and shackled by absurd restrictions until he has become a idle and shocked spectator at a farce.

These restrictions have been brought about chiefly by the influence of lawyers sitting in the State Legislature as lawgivers.

THE JURY JOKE
Juries have power; but almost no responsibility. They decide intricate issues such as the sanity or insanity of criminals—subjects concerning which they could, in the nature of things, have no possible knowledge. Yet a custom has grown up whereby jurors are pledged to

Some sentimental moron or a jury saves a murderous wretch like that sailor Charleston from the gallows "because he is such a handsome, sweet boy;" yet the identity of this juror is screened from a public which has every right to know.

The vote of every juror should be registered publicly. For the time being, every juror is a public official. They should be

A LIFE FOR A LIFE
Experience has shown that there is only one way to break up a public murder debauch. That is to execute every person who takes a life—no matter what the excuse or cause.

That is the way the Vigilantes broke up the gangs in the old days of San Francisco. Unless our courts are allowed to function

tion, it will surely come to that again. Let us save ourselves this disgrace—of mob justice.

MORE CARS DEMANDED

Highland Park Residents Will Hold Protest Meeting

A meeting of Highland Park residents to protest inadequate streetcar service in their community will be held tomorrow evening at the Washington Presbyterian chapel, Highland Park. The meet-

The meeting will be open to the public and will discuss the framing of demands that more cars be furnished Highland Park commuters during the rush hours and transfers from street cars to busses issued. Paving improvements will also be discussed.

STANDARD CITY
SALARY SOUGHTSimilar Rewards for Like
Positions PlannedRate Changes Authorized
Under New CharterCouncil Meets Today to
Tackle Problem

The problem of standardizing salaries paid in all departments of the city government for similar services as provided for by the new charter, will be tackled today by the City Council on motion of President Workman and Councilman Hall, who will urge the appointment of a committee to study the problem.

Under a resolution to be presented today by these Councilmen, the appointment of the committee is authorized to consist of one member of the City Council, the director of budget and efficiency, and one member each as elected by the water and power commissioners, harbor commissioners, library directors, park commissioners and playground commissioners.

This committee of seven, it is expected, will meet early next week, their task being to examine the rates of salaries paid all classes of employees embraced in the classified civil service of the city and to recommend changes of salaries to the end that like salaries shall be paid for like duties and shall be nearly as possible conform to the salaries paid for similar work in private employment.

To this committee will be sent a large number of proposals and requests for increases in salaries including most of the increases recommended by the former Council for 1935 employees at a total increased annual pay roll expenditure of \$55,149.

The Council, as a committee of the whole, selected twenty-one employees and recommended increases for them totaling \$993.93 in increased pay roll expenditure annually, and this report will be acted upon by the Council today.

An effort was made to standardize salaries in the city government service about eight years ago, but since that time there have been many changes in duties and salaries, and the water, power, harbor and other self-sustaining departments are paying higher salaries than other branches of the city government, so the special committee will make an effort to equalize the entire schedule.

RAPPAPOORT TRIAL

Attorney in Bankrupt Case Faces
Fourteen Counts

Max Rappaport, prominent attorney, today will appear before Judge Reese for trial on fourteen counts of grand larceny and embezzlement brought against him after an investigation into the affairs of the bankrupt Rosecrest Farms, Inc. The attorney is charged with complicity in an attempted concealment of funds and diversion of capital belonging to the bankrupt concern. According to the theory of the State, Rappaport was responsible for a plan to obtain goods on credit, hide them out and then go into bankruptcy. W. A. Hawley and M. Gradovitz, partners in the company, will testify against the lawyer.

COUPLE SUED AS HOME RAIDERS

House Furnishings, Garden Hose and \$4 Straw Hat Taken
From House During Absence on Business Trip, Man
Charges in Suit for \$1185.54 Damages

When C. J. Rambo returned from a business trip to Sacramento last spring and unlocked the door of his home he was amazed. His furniture was gone, his books had disappeared, his garden hose and his garage tools had been appropriated by someone else and even his straw hat, "value \$4," had been smashed and damaged to the extent that it was worthless for any other purpose except as an exhibit in a claim for damages.

All this he recited in a suit against William L. La Roque and Florence La Roque, in which he demands \$1185.54 worth of legal satisfaction and harm.

It was the La Roques, he declared, who had accomplished the havoc of his residence. He did not go so far as to give to a wondering world any inkling of a reason for the alleged conduct of the La Roques, simply painting them as cuckoos who had invaded his home nest and ruthlessly looted it.

LOCAL BUSINESS
MAN SUCCUMBS

(Continued from First Page)

Henry, a Los Angeles bond broker, and George Louis Henry of Oakland, a Southern Pacific locomotive engineer, were killed in a collision with an Imperial Valley produce organization, and Wilbur Henry, a bond broker, Mrs. Aubrey E. Austin, wife of a Santa Monica paving contractor, is a daughter. Sisters of Mr. Henry are Mrs. J. J. Farmer of Los Angeles; Mrs. Sarah Fowler of Oceanside, and Mrs. A. Montague of Pasadena. A son, A. Henry of Arroyo Grande, is a brother.

Tentative funeral arrangements call for services Wednesday afternoon at Bessie Brothers' chapel, with burial in Inglewood Cemetery.

Henning Only
Federal Judge
at Work Here

E. J. Henning, appointed several months ago by President Coolidge to take the place of Federal Judge Bledsoe, resigned, will be the only United States district judge at work this morning. Judge McCormick has been presiding over Federal court affairs alone during the past week, departed yesterday for a trip throughout the Northwest and Judge Henning is resting after arduous duties as senior jurist.

Judge Henning will be called upon to temper justice with mercy this morning when Morris Orattli, denaturalized and proven Italian pioneer of the city, appears to ask probation from a twenty-year prison term and a \$2100 fine imposed by Judge Bledsoe for attempting to bribe Harold H. Dolley, former district prohibition chief.

A half dozen petty liquor and narcotic cases also will be up before Judge Henning.

WILSHIRE APARTMENT
RANSACKED BY THIEVES

Gaining entrance through a screen window on the first floor, thieves ransacked the apartment of John A. Pansen, 827 South Mariposa street, early yesterday morning and stole jewelry, clothing and radio valued at approximately \$1000, according to a report made to the Wilshire police.

SPEEDER COURT
REDUCES SPEED

(Continued from First Page)

gave the benefit of the doubt to the man, before the bar. But Thursday they had plenty of time, so there wasn't any doubt in my mind.

By this time I must have assumed that there are no good excuses in the eyes of the court when applied to traffic violations, or that the extra twenty seconds weren't put to good use some of those who appeared before the court.

Take the case of—well, let's call him Mr. Newberry, the judge didn't want to reveal his name because a poor boy has blushed enough already. Anyway, Mr. Newberry was pinched for driving without lights and came to court for a following letter from his family physician:

"To the Honorable Judge Forbes: Please be it known that Mr. Newberry was driving home from the hospital at the time of his arrest for not turning on the light switch.

"He was just too engrossed with the joy of his wife's recovery to realize that the world wasn't dark enough for auto lights. He is a real good citizen and pleads your leniency."

Judge Forbes looked at the face of the proud father and suspended sentence.

EARLY HOUR
AUTO CRASH
KILLS MANCompanion Badly Hurt
When Car Hits Curbing
and Turns Over

John J. Beck, 1148 North Lake street, Pasadena, was killed and Corwin B. Bussey, 441 North Mariposa street, also of Pasadena, was seriously injured when the automobile in which they were riding hit the curb at Mission Road and Huntington Drive early yesterday morning and turned over, pinning them both beneath the wreckage.

Beck died at the police ambulance en route to the Receiving Hospital from a crushed skull and chest. Bussey was given emergency treatment at the hospital and later removed to the Pasadena Hospital, where it is said, he is in a critical condition. Bussey is suffering from a fractured skull and crushed left chest in addition to other injuries.

The overturned automobile was discovered by passing motorists who telephoned the report of the accident to police headquarters. The body of Beck was removed to Morgan & Weson Undertaking Company in Pasadena.

Death Case to
be Influenced
by 'Gas' Test

Whether the fluid used to wreck a building at Graham Station, owned by George Ferlin, was gasoline and of sufficient strength to cause the explosion that preceded the fire at the place, will be an important question tomorrow when the case comes up for hearing before Justice Ambrose. Ferlin is accused of the murder of Walter Steala and of arson. Steala was badly burned that he died the day after the fire.

Deputy Sheriff Rankin and Large found four five-gallon gasoline cans in the place. A small quantity of the fluid was found and the Saturday County Chemist Walker announced that it was a low grade of gasoline, but capable of causing great damage in an explosion. The case will be prosecuted by Dep. Dist. Atty. Terrill.

SHRINE BUILDING
TO OPEN IN FALL

(Continued from First Page)

where five great Moorish arches make a grand entrance. Ample provisions are contained in the structure for a magnificent roof garden with a splendid view of the city and mountains, conveniences abound in the building.

"The Shriner are building this without anything being asked of the public," Lewis M. Cole said, "and I believe that it will be a great thing for Los Angeles to have such an auditorium and hall available for large meetings. Our order has 900 members and they have been subscribing for the \$700,000 preferred stock issue put out by Al Malakiah Auditorium Company. The Shrine is performing a real service for the city in providing this great building."

In 1908 the order built a temple on the site of the one now being erected. It was destroyed by fire in 1920. The new temple was begun in September, 1924, and is to be completed by November 15. Extensive exercises are to be held late in November. Mr. Cole said.

A \$55,000 pipe organ, one of the largest in the world, Mr. Cole said, will be installed in the auditorium. The orchestra pit will accommodate 250 players. Huge air fans will change 200,000 cubic feet of air a minute in the building.

The big banquet hall can be converted into a dance hall of immense proportions. Refreshment and smoking rooms are provided in abundance.

NEGRO SHOT TWICE IN
RESISTING VICE ARREST

Resisting Officer Le Berthion of the vice squad who had pinned him under arrest early yesterday morning and attempting to snatch his gun from him, William Brice, a negro, 31 years of age, of 1544 East Twenty-first street, was shot twice in the left leg. He was removed to the Receiving Hospital for treatment and later placed in the City Jail, where he is being held on a charge of vagrancy and resisting an officer. Brice was arrested at Sixty-fourth street and South Hooper avenue.

YOUNG TRIAL OPENS TODAY

State Prepared to Fight Expected Move of Asserted
Wife Slayer for More Time

When Dr. Thomas Young, confessed slayer of Mrs. Grace Grogan Young, his wealthy wife and whose body was found in a cistern beneath her Beverly Glen cabin, appears for trial on the murder charge this morning an effort will be made by his attorneys to obtain a continuance of the trial.

Dr. Young's trial for his life opens at 10 a. m. today in Superior Judge Hahn's court. Though Cooper, Collins & Shreve, his defense attorneys, will exert every effort to have the trial postponed, Chief Dep. Dist. Atty. Fitts stated yesterday that the prosecution is ready for trial and that any move for a continuance will be strenuously opposed.

Witnesses summoned. About thirty-six witnesses have been subpoenaed to testify against Dr. Young, who has repudiated the three confessions which he made on the night of the finding of his wife's body after the dentist had led the officials to the burial spot. The witnesses include investigating officers, relatives of the slain woman, alienists and friends of Mrs. Young, to whom the dentist had given conflicting explanations of his wife's disappearance.

Though no announcement has been made, the defense is expected by Dr. Young in his fight for his life, the actions of his attorneys on his mind. To ride such a defense, Dist. Atty. Fitts sent Dep. Dist. Atty. Denison eastward last week to obtain evidence to controvert Dr. Young's insanity plea.

Mrs. Grace Grogan Young was the former wife of Patrick Grogan, millionaire olive grower, who died and left his estate of \$1,600,000 to his son, Patrick. She later married Dr. Young and after two years of married life she disappeared under mysterious circumstances. Dr. Young insisted that his wife had fled and that he had frequently received communications from her during her disappearance.

YOUNG IN GAY MOOD. Relatives of Mrs. Young held the belief that she was dead, but for two months they were unable to obtain co-operation of authorities in seeking proof for their belief. Finally, upon the suggestion of a Times reporter, the brother of Mrs. Young, Dr. Young, told his story to Dep. Dist. Atty. Harold L. Davis. A sweeping investigation followed.

START DUE ON ADAMS DRAIN

Contractor Gives Word That Work Will Begin on
Storm Sewer This Month

Councilman Sparks of the Fifth Councilmanic District announced yesterday that he had been assisted by Contractor Peter R. Gadd that work will start before September 1 on the laying of the storm drain under West Adams street from Thirteenth avenue (Montclair street) to the western city limits at Myrtle Lane. The Councilman said the contractor plans to have the storm drain completed before the winter rainy season so that this westerly section of West Adams street through the Glen Airy district which has been flooded with storm water during the winters will be permanently free of this, beginning this winter.

After the storm drain is laid, then will follow the widening of the roadway to 70 feet from its present width of 55 feet, the installation of sanitary sewers, and the paving. Councilman Sparks said that he believed that in view of the speed Contractor Gadd is showing with the \$2,000,000 South Main street storm drain, the entire West Adams improvement will be completed not later than February 1.

The entire improvement will cost \$152,049, which was Contractor Gadd's bid as accepted by the Board of Public Works. It was \$30,000 lower than the second lowest bid and was \$31,500 less than the City Engineer's estimate as to the cost of the work. Toward the expense the county has agreed to appropriate \$150,000 as the improvement will be of general benefit as serving county territory lying between the city and the ocean. The paved West Adams street will also provide an improved traffic artery between the city and Venice and other Santa Monica beach cities.

West Adams Post No. 254, American Legion, Juan Curdoso, was arrested Saturday night following the stabbing of Rachael Alonso, 719 Yale street. Gonzalez was recognized by Dep. Lieut. Craig when he was taken to the Central Police Station accused of stabbing Alonso. The Mexican woman, the police said, was murdered three years ago when a man believed to be Gonzalez kicked her in the stomach. Gonzalez was held last night on a charge of suspicion of murder.

HUNT HINDU IN SEARCH
FOR MISSING FAMILY

Police were asked yesterday by the Sheriff of Merced county to search for John Kotia, 50 years of age, a Hindu, who is reported to have left Merced with Mrs. Anna Suca, 31 years of age, and her three children. They are believed to be living in India. The children are two boys, 8 and 7, and a girl, 4.

GIVES BIBLE PARLEY PLANS

Program of Pacific Coast Conference Opening This
Week is Announced

Rev. John M. Barnhart, pastor of the First Methodist Episcopal Church of Baltimore, who will preside at the Pacific Palisades from the 19th to the 20th inst., yesterday announced the completed program for the meetings. The sessions will be conducted under the auspices of the Methodist Camp Meeting Association of Southern California and ministers and members of all denominations are invited. Adequate housing facilities have been provided for those who wish to remain at the Palisades during the conference.

Dr. Charles L. Goodell, famous evangelist from New York City, will conduct a school of pastoral and personal evangelism at 10:30 a. m. every day and will also preach every evening, excepting on the 19th and 20th inst. Representative ministers of various denominations will preach at 2:30 p. m., every day, excepting the 24th, 25th and 28th inst. days set aside for the meetings of women's societies. Joseph Waugh will be some leader, accompanied by Miss Ruth Mahood. Dr. E. E. Helms of the First Methodist Church will be the preacher on the evening of the 19th inst., while on the evening of the

WOMAN DOCTOR
to be Charged
With MurderDr. Lillian Smith of Downey, accused
of having performed an illegal
operation upon Mrs. Lola
Bryant, resulting in the woman's
death from blood poisoning in the
General Hospital, will be charged
with murder, Asst. Dist. Atty. Fitts
said last night.

The woman physician is in the County Jail where she was brought following her arrest two days ago. Authorities say the physician has admitted having performed the fatal operation but did so only at the urgent pleading of the patient and only after Mrs. Bryant had signed a statement freeing Dr. Smith of responsibility.

LONG-BOUGHT CUTTING
SUSPECT ARRESTED. Juan Gonzalez, wanted for three years by the police here in connection with the murder of a Mexican woman, Juana Curdoso, was arrested Saturday night following the stabbing of Rachael Alonso, 719 Yale street. Gonzalez was recognized by Dep. Lieut. Craig when he was taken to the Central Police Station accused of stabbing Alonso. The Mexican woman, the police said, was murdered three years ago when a man believed to be Gonzalez kicked her in the stomach. Gonzalez was held last night on a charge of suspicion of murder.

The Helping Hand. Aunt Kate (horrid!) Good gracious, Robert, what would you papa say if he saw you smoking that nasty cigar?

Bobby (calmly): He'd be tickled to death. It's one of the birthday cigars mother gave him.—(Boson Transcend.)

Dr. Thomas Young. When Dr. Thomas Young, confessed slayer of Mrs. Grace Grogan Young, his wealthy wife and whose body was found in a cistern beneath her Beverly Glen cabin, appears for trial on the murder charge this morning an effort will be made by his attorneys to obtain a continuance of the trial.

CARLISLE STEVENSON AND HIS
BON TON BALLROOM
ORCHESTRA

have participated in these special
programs from K.H.J.

A selection by a composer rarely
heard on the air, Dell'Acqua,
was the cause of an unusual
number of inquiries following his
excellent rendition by Myrtle Mae
Clark on the Saturday evening
program. The song "Villanelle" as
one of her numbers. It is the
most prominent musical effort of
this composer.

The tower studio of The Times
will observe its usual weekly
broadcast today, with all broadcasting
ceasing after this afternoon in con-
formity with K.H.J.'s policy of per-
mitting set owners to try for dis-
tance.

TODAY'S PROGRAM

7 to 7:15 a.m.: "Morning-Up Ex-
ercises" by Prof. Barclay L. Sev-
erance.

11 to 11:30 noon: Leighton's
Arcade Cafeteria Orchestra, Jack
Cronshaw, director.

12:30 to 1:30 p.m.: Program of
dance music, featuring Carlyle Ste-
venson and his Bon Ton Orchestra,
from the Bon Ton Ballroom,
Ocean Park.

1:30 to 2 p.m.: Special program
commemorating the wedding sixty
years ago of Mr. and Mrs. Carey
R. Smith of Santa Ana, formerly
of Iowa City, Iowa. Program su-
pervised by their grand-daughter,
Mrs. Louise S. Hopkins.

LOCAL SCHEDULE

**ASSERTED CREDITOR
-SUES MOTHER OF KATZ**

Suit for \$10,000, claimed as due
from the estate of Harry I. Katz,
diamond broker, whose murder a
few months ago has not yet been
solved, has been filed against Dora
Katz, his mother and administra-
trix of his estate, by M. Weinstein.
Weinstein in his complaint sub-
mitted that his claim comprised
accounts and notes due himself
and various other persons, chiefly
diamond merchants, for whom he
is assigned. He declared that his
claims, entered with the adminis-
tratrix, had been disallowed.

MOTORCYCLE OFFICER HURT

John Snyder, 30 years of age, a
motorcycle policeman, was thrown
from his machine yesterday when
he skidded at Sunset Boulevard and
Lucille avenue. He suffered a dis-
located shoulder and other in-
juries.

PAINT WAR SETTLED

A Los Angeles taxi cab owner a paint brush and a bucket of
paint and he can stir up weeks of grief for the
division of Public Utilities and Transportation, according to mem-
bers of the taxi cab industry, which is trying to standardize the color schemes
for the taxis.

**Film Comedian
Breaks Leg on
Hollywood Lot**

Fred Peters, motion-picture
comedian, received a broken left
leg and other injuries Saturday
afternoon while working on a set
at the Christie studios in Holly-
wood.

Peters was crushed against a
wall when a tractor, which was
being used in staking a dock
scene, swerved and struck him.
He was taken to the Hollywood
Hospital, where it was at first
thought he was injured internally,
but an X-ray failed to reveal a
serious injury.

**Pepper Bandits
Take Cash and
Ring of Victim**

Red-pepper bandits yesterday
robbed James Beards, 422 South
Hollywood street, of \$35 and his watch
and ring, he reported yesterday.
There were two men, he said, who
came up to him on Fourth street,
between Olive and Grand avenue,
and dashed a handful of red pep-
per in his eyes. Then they rifled
his pockets. Beards was unable to
describe his assailants. He had his
eyes treated at the Receiving Hos-
pital.

ARCHITECTS URGE ADDED INSTRUCTION

More Emphasis to Course
in Designing Advocated
for University

Plans for the establishment of
a school of architecture, in con-
nection with the University of
Southern California now are be-
ing made, according to an an-
nouncement yesterday by univer-
sity authorities. This decision was
reached after careful consideration
of recommendations made to the
university by the Allied Architect
Association at the conclusion of
the last college term for greater
emphasis in training of architects.
During the past year the associa-
tion, composed of seventy practic-
ing architects of Southern Cali-
fornia, worked in close co-opera-
tion with the University of South-
ern California in this department.
Feeling the need of more de-
tailed instruction in architectural
education the association recom-
mended that the present depart-
ment of architecture be reorgan-
ized into a separate school of ar-
chitecture, on a par with similar
schools at the University of Cali-
fornia and the University of Ore-
gon. This report is now being se-
riously considered by the univer-
sity.

The new plan proposes that the
architectural course be increased
this year from a four-year to a
five-year course, and students en-
tering this coming semester will
be awarded the degree of Bache-
lor of Architecture upon gradu-
ation. It is further suggested that
the university offer the degree of
Master of Architecture to students
successfully completing six years
in the school, and to others who
meet the requirements for such
degree. The new school of archi-
tecture will be a part of the
university's engineering and archi-
tecture department, and will be
headed by a dean. The school will
be a five-year course, with the
exception of those in archi-
tectural engineering and archi-
tecture, which will be a four-year
course. The two latter courses will
require four years of study before a
degree is awarded.

Greater Film Season Frolic Will be Unique

The Ambassador Auditorium will
be the social center of Southern
California the evening of the 27th
Inst. when scores of the famous
screen stars appear at the sec-
ond annual Greater Film Season
Ball.

For the past week, the cele-
brities of the motion-picture world
have been preparing for the unique
frolic.

Fanchon and Marco, famous
dance exponents and producers of
revues, are supervising the staging
of many features and gorgeous
specialties.

Among the specialties on the
program is an aerial act, to be
performed here from New York es-
pecially for the occasion. This is
only one of the numerous sur-
prises to greet the merry-makers.
The stars themselves are also busy
rehearsing unusual features to be
presented at the ball.

Charles Murray, the well-known
comedian, will act as master of
ceremonies.

COUNCIL TO GET HALL PACT

Public Works Board Asks Approval of Architects'
Contract for Building Plans

All obstacles, so far as the city is concerned, to the starting of
work on plans for the new City Hall are scheduled to be ended today
when the City Council will be asked to approve of the board's contract
with John Parkinson, John C. Austin and Albert C. Martin for archi-
tectural services and supervising the construction of the new \$5,000,000
building.

While the Superior Court has
held that the board has the right,
under the charter to award the
contract, city officials believed that
as a further protection of the city's
rights it would be well for the
Council to approve of the board's
action.

The architects will receive a fee
of \$270,000 or 6 per cent of \$4,500,000 for their services and
\$50,000 in order to have \$500,000 in
hand for contingencies that may
arise or changes in plans that may
be made.

The three architects have depos-
ited with the board an agreement
and a \$50,000 bond to pay all

BOBBIE TORT,
BLUE SINGER.

Anniversary Celebrated

Actress Here on
Vacation Takes
Lead in Pageant

Arriving in Los Angeles only last
week on what she expected to be
a real vacation from "Theban ac-
tivities," Miss Vivian O'Sullivan of
Memphis, Tenn., yesterday donned
gown and stepped into the mas-
terson pageant-play at Ran Juan
Capistrano.

Miss O'Sullivan's arrival and her
consent to forego certain of her
vacation pleasures to play the lead
without pay for her services, saved
the day for Garnet Holmes, pageant
director of the National Parks, who
is staging the mission spectacle.

Miss Doris Schukow, who played
the principal role, was called East
to fulfill an important theatrical
engagement, leaving Holmes without
a leading lady. He met Miss
O'Sullivan at a dancing party last
Thursday and found her just the
type for Margaria, heroine of
the play.

Miss O'Sullivan achieved fame in
her native city for her appearances
in the Little Theater and the Nine-
teenth Century Dramatic Club in
Shakespearean roles and allegori-
cal plays. Her presentation yester-
day of the Spanish senorita accon-
tained even friends familiar with
her thesaurical career. She will ap-
pear as the feminine lead at the
regular Sunday afternoon perfor-
mances and the concluding special
presentation of the pageant-play on
Labor Day.

**PROTECTION FOR CITY
AUTO DRIVERS ASKED**

City Engineer Van Norman has
recommended to the City Council
that the public and city employees
be protected from liability for
damages done by city-owned, or
city-driven automobiles and trucks
by the city's carrying blanket in-
surance for this purpose. The
council has held that municipali-
ties are not liable for damages to
persons and property resulting
from actions of city employees, and
the City Engineer pointed out that
city employees driving city ma-
chines are now liable for damages,
although the employees may have
been in no way responsible for the
damage. The city now requires
all truck owners who make regu-
lar trips by the city on a rental
basis carry liability insurance, and
the City Engineer has recommend-
ed that the City Council provide
liability insurance to cover all
city-owned machines.

Reorganization Sale

Lower Prices on Good Home Furnishings

COME where you may choose from
new styles in furniture of depend-
able quality at lower prices. A new
eight-story building filled with beau-
tiful new furnishings for all kinds of
homes at the lowest prices we have
ever quoted.

An opportunity like this may never
come your way again. Take advan-
tage NOW while such great savings
are possible in all lines.

9-Pc. Dining Suite
As Pictured
Sale Price \$144.75

This price includes 45x60 in. 8
ft. extension table and 60-inch
buffet in genuine two-tone wal-
nut with 6 side chairs and host's
arm chair to match. Pieces sep-
arately if desired, as follows:

Buffet, \$42.50
Chairs, ea. \$8.75
Table, \$39.75
Arm Chair, \$9.75

5 Super-Grade Dining Suites

9-pc. Dining Suite in mahogany, formerly... \$895.00
9-pc. Dining Suite in mahogany, formerly... \$935.00
10-pc. Dining Suite in mahogany, formerly... \$1095.00
9-pc. Dining Suite in French walnut, formerly... \$1100.00
9-pc. Dining Suite in mahogany, formerly... \$1140.00

Choice now
\$695

Any of these suites are values worth featuring at this comparatively low price. As
there is but one of each, we have grouped them for advertising and to provide great-
er choosing. It would take an entire page to describe them but we can only say,
come and investigate, it will be well worth while if you seek a saving on super-
quality dining furniture.

First National Pictures' Chief Returns East

Richard A. Rowland, general
manager of First National Pictures
Corporation, left Los Angeles yester-
day to return to New York.
The film executive has been in
Hollywood on a short tour of in-
spection and to plan next year's
program of the company with John

McCormick, in charge of West
Coast production.

Among other things, Mr. Row-
land said that several big spec-
taculars would be filmed here next
year, each costing in the neigh-
borhood of \$1,000,000, and it was
probable that First National
would keep at least five units busy
during the season.

Praise was given by the execu-
tive before his departure, agent his
inspection of the activities in Cali-
fornia.

one of the most interesting pic-
tures I have laid eyes on in some-
time, and it should make a big
hit with her fans.

"Edwin Carewe's new production
justifies our confidence in him,
which caused us to place him un-
der contract to make four more
productions for us. It was made
under the title of 'The Sea Wom-
an,' and has Blanche Sweet in the
featured role.

"It is needless to say that I am
all enthused over Colleen Moore's
version of the Israel Zangwill com-
edy, 'We Moderns.' The 'rushes'
so far indicate that it will rank
with any of Colleen's previous pic-
tures.

a return of fewer and better pro-
ductions, made with an eye on the
wants of the motion-picture pa-
trons," Rowland concluded.

Many notable women in Phila-
delphia and Pennsylvania have
subscribed toward a million-dollar
hotel and club for women to be
erected in Philadelphia.

ANNUAL FAIR AT RIVERSIDE

**Improve Grounds for This
Year's Event**

**Offer \$10,000 in Stakes for
Race Program**

Committee Names Heads of Department

[LOCAL CORRESPONDENCE]

RIVERSIDE, Aug. 16. — With plans rapidly shaping and contracts let for immediate construction of special exhibition facilities, the

According to J. E. Wherrell, president of the Southern California Fair Association, this year's show will introduce many novel

A large crowd has been put to work resurfacing the race track preparing for the arrival of many of the fastest race horses from various western States. Purses of \$10,000 are to be offered. It is stated.

In addition to the permanent show buildings several mammoth circus tents are to be raised to house the agricultural and industrial exhibits. A huge 156-foot stage is to be erected in front of the grand stand on which to present the "amusements and sporting events."

The executive committee is comprised of Harry H. Hinde, J. R. Gabbart, H. W. Hammond, Ed M. Doyle, J. F. Bachstrand, S. L. Mapes, J. E. McGregor, J. T. Garner, J. R. Westbrook and C. E. Brouse. Officers in addition to

President Wherrell are H. H. Hinde, vice-president; LeRoy Simms, treasurer, and Mrs. C. C. Craven, secretary.

Division superintendents are to be as follows:

Horses, F. L. Hall; cattle, George W. Thomas; swine, F. A. Langdon; sheep, John Hammer; goats, Oscar Crowell; apiary, R. Powell, agricultural and horticultural, O. K. Keasey; child's welfare, Riverside

**Van Nuys Man
Has Hatchery
for Gold Fish**

[LOCAL CORRESPONDENCE]
VAN NUYS, Aug. 16.—A new industry which has just opened here is a gold-fish hatchery, the owner being F. D. Woodward, Fulton avenue and Erwin street, east of the Van Nuys townsite. Mr. Woodward owns four acres at this site, one of which he is dedicating to the hatchery.

Among the varieties are telescope-eyed Japanese fantails, red and black fantails, calico breeds, comet straight tails and silver fantails. In some of the pools are various sorts of oxygen-supplying plants, including camel's-hair fern, water lilies, the anacharis plant

Woodward stated today that there is a good demand for gold fish in large quantities, and that already he is doing a good business in various markets.

REDMEN TO MEET

Fraternal Order Gathers For State
Fair - W.

SAN LUIS OBISPO, Aug. 16.—Two thousand members of the Improved Order of Redmen are expected to be in this city next week for the fifty-ninth annual State convention, which convenes the 18th inst. for a five days' session. Elaborate plans have been made for the event and the city has been decorated.

will be decorated with flags and electric lights on the occasion. Two grand balls will be held by the members and there will be a special sightseeing trip to Pismo Beach, with a "clam feed" as a part of the entertainment features for the visitors.

The Degree of Pocahontas, the women's auxiliary to the Redmen, will hold its sessions at the same time. Tocoloma Tribe No. 160 of Redmen and Yulupa Council, De-

free of Pocahontas of this city, will act as hosts to the visiting members of the order, and \$2000 will be expended for entertainment.

LANKERSHIM CONCERN NAMES NEW OFFICERS

[LOCAL CORRESPONDENCE]

LANKERSHIM, Aug. 14.—The

Lankershim Ladder Company, a concern which manufactures orchard ladders in wholesale quantities, conducted a reorganization meeting and elected the following stockholders as directors: J. C. Rediger, W. D. Rediger, D. A. Rediger, T. H. Bankston and Pearn Hinkley. D. A. Rediger was elected president; Hinkley, general manager and W. D. Rediger, secreta-

ry-treasurer. The plant is doing
a satisfactory business, the de-
mand for its product having
doubled within the summer
months.

LOEW'S BIG BILL

CORINNE GRIFFITH, CHINESE PLAYERS, GREAT

By Grace Kingsley
Somewhere in America Hartley Manners discovered a girl who just loathed jazz and he put her in a play. He should. Or maybe in a museum under glass would have been better. Anyhow, having believed that much, you can believe the rest of "The National Anthem" isn't so hard to believe. Mostly it we have believed so many times before!

"The National Anthem" has been renamed in the cinema—it would be—"The Marriage Whirl." And you may see the flower-like Corinne Griffith in it at Loew's this week. I like the picture because I like Corinne Griffith in anything, not because she is an especially good actress, but partly because I'm not sure whether she is or not, and because of her beauty and a poignant personal appeal that simply clings to our hearts and sensibilities and will not be discarded.

But before I say another word about the picture, I've simply got to let myself go about the marvelous Chinese warriors, whom Fanchon and Marco have cannyly annexed for their revue. Fanchon and Marco have merely been practicing on us before. Now they have the art of revenging a insult down to perfection, at least to my way of thinking.

But about those Chinese warriors—how on earth did they escape the eagle and eagle eye of the big-time bookers? They are the freshest, thrillingest act this big town has seen in many a long day. They whirl lances and battle-axes in time to the music, and in such wild and barbarous fashion that you don't see how any of them escapes sudden and bloody death. Mostly they work in pairs; and they lunge at each other, fend off attack, leap lightly away from a whirling lance or a swiftly-glancing battle-axe blade in a way to give even Douglas Fairbanks a constant sound of the shock of battle arms, appeals to something elemental in all of us. No matter how many of these acts I shall see hereafter—and probably there will be a lot of them to follow—I shall never forget this first experience.

The act carries, too, a young Chinese tenor with a simply gorgeous voice—voluptuous and rich in quality like that of an Italian. His name is Joe Wong, and but for a slight tendency to falter some of his notes—he was it merely that he was a bit nervous at his first performance?—his voice would be simply entrancing. Joe Wong is a nice little Chinese boy, who charmed in some songs and a dance. And of course there was a lovely chorus. Fanchon deserves all the credit in the world for developing personality in her dancers.

And now again for "The Marriage Whirl," which is in fact, indeed, that I think after seeing it no girl will be the wiser to take a whirl at the marriage whirl for the sake of reforming a man, as this girl does. She starts drinking and leaving to her husband, and of course, she loses him.

But never mind, he apparently gets killed in an automobile accident, so she can marry the clean young hero, played by Raymond Ford, who, by the way, does nothing in the way of acting except just stare and stare at crucial moments in the plot. Of course, we aren't quite sure the husband is killed, though his spirit seems to visit his young wife's bedside after the accident, so we hope he was.

As the rest of the story is obvious, this part comes as a distinctly quaint bit. Kenneth Harlan is playing him every inch an actor these days. Corinne Griffith characterizes deftly, and Nita Naldi does her usual long wavy-length winking and sneering.

As the rest of the story is obvious, this part comes as a distinctly quaint bit. Kenneth Harlan is playing him every inch an actor these days. Corinne Griffith characterizes deftly, and Nita Naldi does her usual long wavy-length winking and sneering.

Los Angeles Girl in New Play

PLAYDOM RESTORES HUMANNESS

"Drusilla With Million" Has Fine Heart Interest

BY EDWIN SCHALLERT
Heart interest has at last been rediscovered for the screen, and, as a consequence, audiences may as well be forewarned to be wary and take extra pocket handkerchiefs with them when they go to see "Drusilla With a Million." It is the best feature of the tearful type, destined to make everybody happy that has been shown on the screen, seemingly in ages, and I imagine that owing to this fact alone there will be an unusual pilgrimage to the Forum Theater, where it is on view, this week.

Somewhere, the type of films, of which "Drusilla With a Million" is representative, have been all too scarce during the past several seasons. They have been supplanted by a jazzier and more artificial entertainment, and it is a satisfaction once again to come back to home base and really be able to watch something that is human.

I don't say that "Drusilla" is any more real than lots of other pictures. Very few are real any longer. But this, at least, embodies an idea that is worth more than a passing interest, and furthermore it will make anyone who sees it feel somewhat better for having seen it. And that is something.

The clever situation on which the whole picture hinges is the fact that the down-trodden charity inmate of an old ladies' home, where the other "girls" all pay their own way, inherits a million dollars.

The other part of the plot pertains to an "idle rich" son, and his love for a girl who is a little wait. The two themes are ultimately woven together in a climax that may be old and may be hokey, but that is deeply touching just the same.

The director, F. Harmon Wright, has evidently felt the Griffith influence, at least the Griffith influence that used to exist at one time. He has captured something of its essence of sunshine and shadow. There is no glitter about the production, and I do not imagine therefore that it was very costly. But whether it cost a fortune or a pittance, it is the sort of feature to which the great majority of film-goers have always shown devotion, and to which they probably always will show devotion. Sentimental it may be, and badly overdrawn at times, with the courtroom scenes that are so common, but it is an excellent relief from so-called sophistication.

Mary Carr starts from the poorhouse in this picture, where she came very near to ending there in "Over the Hill." She is Drusilla, and the million she inherits is used to provide a home for orphanage, much to the dissatisfaction of the snug neighborhood where she lives. Miss Carr has not had a better role since "Over the Hill," and this one, I feel, is more human because it has more of the least of comedy.

Priscilla Bonner, in her final scene, is a beautiful actress, and her portrayal throughout has a note of rare charm and quietness. The courtroom episode was her special triumph. She helped to make much of an otherwise rather weak sequence.

Kenneth Harlan is very consistent as the hero, and depicts calmly in certain scenes the loyalty that he holds for the girl whom he has married.

William Humphreys evidences fine reserve as the trouble-making attorney. Henry Barrows and Claire Du Brey are other principals. The incidental characters, especially those in the old ladies' home, are superbly played, and it is regrettable that more names are not as a consequence mentioned in the cast sheet.

Yes, if you like the good old days of the tear and the smile combined in the film, "Drusilla" has much indeed to commend it. I would be quite willing to predict that it is going to register prominently in the season's entertainment for the enjoyment that it will bring.

In the prologue—which has nothing to do with the feature as it happens—Hazel Kennedy, the little youngster, is a hit with her eccentric comedy of dancing. She overdoes just a little, however, in her dance and Elaine Elliott also dances with much success. Gus Reed is the singer on the program.

New Bloch

Concerto at the Bowl

Ernest Bloch has again enhanced his place as an idol of the Hollywood Bowl concert. He has proved his brilliance both as a composer and conductor on several different occasions, but the performance of his "Concerto Grosso" last Saturday evening has apparently given new impetus to his fame with audiences at the outdoor amphitheater.

The "Concerto Grosso," scored for piano and string orchestra, was a distinct novelty. The presentation was the first public one given of the work, and it therefore had an especial glamour.

Bloch is really a master of moods, and imbues his music with an ever-changing texture that is fascinating. This was splendidly shown in the concerto. The vitality and strength of the prelude contrasted strikingly with the poetic drive. This varied again in a delightful way with the presentation of the Pastorale and Rustic Dance. The Fugue which culminated in evidence of the fine fundamental character of Bloch's musicianship, which has enabled him to attain so excellent a goal along more modern pathways.

It was indeed a notable and interesting presentation, which in its reception indicates that the concerto is likely to be a favored work, and, therefore, brought a

SWEET AND SIMPLE

STORY AT RIALTO

"Rugged Water," Tale of Cape Cod Life, Lacking in Humor and Thrills

"Rugged Water," now at the Rialto Theater, leads the mind into quiet waters and keeps it there. There is not one objectionable element in the picture. It is one of Joseph Laskin's quaint stories of sea folk and Famous Players-Lasky has brought it to the screen in its simplicity. However, if the truth must be told, "Rugged Water" does not particularly hold the interest.

The quaint, whimsical humor, which should have remained with the story, is lost in the presentation of the picture. The costumes of that period have been kept remarkably true to life, and waitresses are offered a very good entertainment and a very good tale—sings several selections.

"THE SWAN" PROVES DISAPPOINTMENT

Unity Lacking in New Production by Pasadena Community Players

Perhaps it is just as well that the Pasadena community company is the only local group that has been given the right to produce "The Swan." Franks Molnar's highly successful comedy. For the production is a disappointing one, far below the usual standard of these capable players. "The Swan" opened Thursday night. The performance was an almost unbearable tendency to drag, noticeable throughout the three acts. And the lack of unity, were the most disturbing features. Though

KELLERMAN REMAINS

The Orpheum bill opening today retains Annette Kellerman and her big revue, with many changes for a second week, and includes Yvette Ruget, the international prima donna; Solly Ward and Marie Murray in "Babes," Jerry Jargan, now "all alone" at the piano; Frank Davis and Adele Darnell, of "Birds"; and a production which Franks Molnar will personally direct.
